SUMMARY

I am a recent graduate Software Engineer with hands-on experience in software development, specializing in NLP, AI/ML. I design and build intuitive user interfaces, focusing on enhancing automation processes. At Saregama India Ltd., I worked in the IT Department and contributed to HR recruitment initiatives.

EDUCATION

B.Tech in Computer Science & Engineering (IoT, CS, BT) University of Engineering & Management, Kolkata, 8.36 / 10.00	<i>Graduated: June 2025</i>
Higher Secondary (Science) Pathfinder Higher Secondary Public School, Kolkata	<i>Graduated: March 2021</i>

WORK EXPERIENCE

Saregama India Ltd. IT & Technology Intern	<i>Feb 2025 - Jul 2025</i> <i>Kolkata</i>
- Developed LLM-based resume screening tool, enhancing candidate shortlisting speed by 40%. - Created NLP pipelines using transformers and prompt engineering for data extraction. - Integrated AI modules into internal dashboards and fine-tuned models based on recruitment metrics.	

PROJECTS

Resume Classifier using LLMs Github	<i>22 Weeks (2025)</i>
<i>Technologies: Python, Google Gemini, TF-IDF</i> - Developed an AI-powered web application for resume analysis and job description matching with help of Google's Gemini AI model. - Built the application with Streamlit and Python to enhance the candidate evaluation process for recruiters and hiring managers. - Implemented multi-format support to allow uploads of resumes in PDF, DOCX, and DOC formats. - Enabled batch processing for simultaneous upload and evaluation of multiple resumes. - Created an interactive dashboard providing real-time analytics on match scores and department-wise performance. - Designed a feature for custom report generation in PDF/DOCX formats for individual or batch analysis. - Integrated role-based scoring to evaluate candidates based on levels such as Junior, Mid, and Senior. - Ensured ATS compatibility through keyword scanning and scoring mechanisms. - Developed department-specific analysis with customizable metrics for various fields including Tech, HR, and Marketing.	
Sentinel - Planetary Surveillance Network Github Website	<i>10 Weeks (2025-26)</i>
<i>Technologies: React19, Typescript, Tailwind CSS, OpenStreetMap with CARTO tiles, Google GenAI SDK,</i> - Built a real-time geospatial dashboard using React 19, TypeScript, and Leaflet for global seismic tracking. - Integrated Google Gemini AI to provide automated situational analysis and critical infrastructure mapping - Designed a high-fidelity cinematic UI with Tailwind CSS, featuring physics simulations and automated patrol modes. - Engineered a robust data layer to normalize and render sub-second telemetry from USGS and NOAA APIs - Developed advanced geospatial features, including proximity alerts and interactive tectonic plate overlays.	
MochiReviews - Review website Github Website	<i>12 Weeks (2026)</i>
<i>Technologies: Next.js, Typescript, Tailwind CSS, Tiptap Editor, PostgreSQL</i> - Reviews are scored with a custom Mochimeter instead of traditional star ratings, offering a unique and playful evaluation method - Covers diverse entertainment mediums including video games, books, TV shows, movies, and music albums all in one centralized platform. Built with Typescript deployed on Vercel ensuring a pooshed and responsive user experience.	

SKILLS

Programming Languages: Python, Java, JavaScript, HTML, CSS, SQL
Frameworks and Tools: Flask, Scikit-learn, HuggingFace Transformers, OpenAI, Gemini, Pandas, SQLite, Git, NLTK, TF-IDF
Data Science and Machine Learning: NLP, ML Models, Data Extraction, Transformers, AI Modules, Recruitment Metrics
Software Development Concepts: REST APIs, OOPs, Data Structures, DBMS, Version Control.
