EDUCATION

University of Engineering & Management, Kolkata

B.Tech in CSE (IOT, CS, BT); Aggregate: 8.36 CGPA

Kolkata, W.B.

May, 2025

Pathfinder Higher Secondary Public School

Higher Secondary (Science); Aggregate: 78.16%

Kolkata, W.B.

April, 2021

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, HTML, CSS, SQL

Tools & Frameworks: Flask, Scikit-learn, Git, TF-IDF, SQLite, Huggingface, Ollama LLMs, React 19, React 18, TypeScript, Tailwind CSS, OpenStreetMap, CARTO, Google GenAI SDK, Vite 5, React Router, Zustand, React Query, FastAPI

Concepts/Subjects: Data Structures and Algorithms, Database Management System (DBMS), Object Oriented Programming (OOPs), Artificial Intelligence & Machine Learning, Web Technologies and API Integration, REST APIs, NLP, ML Models, OS, Version Control

Spoken Languages: English, Bengali, Hindi

EXPERIENCE

Saregama India Ltd.

IT & Technology Intern

Duration: 6 Months

February 2025 – August 2025

- Implementing Large Language Models (LLMs) to automate and enhance the resume screening process within the HR department.
- Designing custom NLP pipelines using transformers, embeddings, and prompt engineering to extract relevant candidate information.
- Collaborating with cross-functional teams to integrate AI modules with internal dashboards and analytics tools.
- Evaluating model performance and continuously fine-tuning based on recruitment success metrics.
- Tools/Tech Used: Python, HuggingFace Transformers, OpenAI API, Pandas, Flask.

PROJECTS UNDERTAKEN

F1 Pulse - Formula 1 Analysis Dashboard

Full-Stack Developer

Duration: 5 Weeks

- Developed a full-stack Formula 1 analysis platform that integrates real historical race data with advanced physics-based simulations for the 2026 season.
- Engineered interactive dashboards and data visualizations using JavaScript (React.js), Python (backend), CSS, and HTML, ensuring a seamless user experience for motorsport enthusiasts.
- Designed and implemented data pipelines to process, clean, and transform large-scale F1 datasets for accurate performance and race analysis.
- Built simulation modules to forecast races and strategies, leveraging both domain knowledge in motorsport engineering and data science best practices.
- Collaborated in a cross-functional setting to deliver an end-to-end product, emphasizing code quality, maintainability, and performance optimization.
- Tools/Tech Used: Python, JavaScript, FastAPI, HTML, CSS.

Sentinel - Planetary Surveillance Network

Duration: 11 Weeks

Frontend Engineer

- Built a real-time geospatial dashboard using React 19, TypeScript, and Leaflet for global seismic tracking.
- Integrated Google Gemini AI to provide automated situational analysis and critical infrastructure mapping.
- Designed a high-fidelity cinematic UI with Tailwind CSS, featuring physics simulations and automated patrol modes.
- Engineered a robust data layer to normalize and render sub-second telemetry from USGS and NOAA APIs.
- Developed advanced geospatial features, including proximity alerts and interactive tectonic plate overlays.
- Tools/Tech Used: React19, Typescript, Tailwind CSS, OpenStreetMap, CARTO, Google GenAI SDK.

ZipRide - Smart Ride Booking Platform

Duration: 11 Weeks

Frontend Developer

- Developed a frontend-focused ride-booking application using React, TypeScript, and Vite.
- Implemented map-based pickup and drop-off selection for enhanced user interactivity.
- Engineered a seamless booking flow with onboarding, wallet transactions, and booking management.
- Built a comprehensive notification center and user profile settings for personalized experiences.
- Achieved robust functionality and maintainability with 98% TypeScript codebase.
- Tools/Tech Used: React 18, TypeScript, Vite 5, Tailwind CSS, React Router, Zustand, React Query.

CERTIFICATIONS & ACHIEVEMENTS

Amazon AWS and Coursera

AWS Cloud Practitioner Essentials

- Gained foundational understanding of core AWS services, concepts and terminology.
- Learned to apply AWS security measures, including effective use of Identity and Access Management(IAM).
- Developed ability to compare and utilize compute services such as Amazon EC2, AWS Lambda, and Amazon ECS.
- Acquired knowledge of AWS storage and database solutions, including Amazon S3, Amazon RDS, and DynamoDB.

MasterCard and New York Jobs Council (Forage)

Cybersecurity Virtual Internship

- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team.
- Helped identify and report security threats such as phishing.
- Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams.

KPMG Australia (Forage)

Data Analytics Consulting Program

- Completed a simulation focused on advising a client on customer targeting with the Data, Analytics & Modelling team.
- Assessed data quality and completeness in preparation for analysis.
- Analysed data to target high-value customers based on demographics and attributes.
